

## REVOLT

**NEXGROW® alfalfa, a brand equipped to deliver the traits and technology you need — now and in the future. NEXGROW® alfalfa brings you the top yield potential, high forage quality and the exceptional persistence you demand. Choose from a line-up of non-dormant alfalfa varieties with Genuity® Roundup Ready® technology.**

### SELECTING A NON-DORMANT GENUITY® ROUNDUP READY® VARIETY

Knowing your geography, climate and preferred cutting schedule are crucial in selecting a proper alfalfa variety. Operations on a 26- to 30-day cutting schedule should opt for varieties with higher fall dormancy ratings. Along with higher forage quality, growers can expect higher persistence in non-dormant varieties with proven NEXGROW® alfalfa genetics.

Another critical component to a strong alfalfa stand is a field without weeds. Along with conventional varieties, the NEXGROW® product line offers an industry-leading portfolio of alfalfa varieties with Genuity® Roundup Ready® technology. Look to REVOLT, a next generation Roundup Ready® variety that offers an excellent combination of yield potential and forage quality and is one of the latest generation fall dormancy 6 varieties available..

### ALFALFA IS ALL WE DO

High yields, quality weed control and outstanding persistence are all essential qualities for long alfalfa stands. NEXGROW® alfalfa varieties with Genuity® Roundup Ready® technology enable growers to plant “full season” alfalfa varieties without sacrificing yield or forage quality. To learn more about NEXGROW® alfalfa, talk to your local Syngenta retailer, seed advisor or visit [plantNEXGROW.com](http://plantNEXGROW.com).

# REVOLT

## NEXT GENERATION VARIETY WITH EXCELLENT YIELD AND FORAGE QUALITY

- Excellent combination of yield potential and forage quality
- Strong agronomic package in a fall dormancy 6 variety
- One of the latest generation fall dormancy 6 varieties available
- Provides salt tolerance at critical stages in plant development

## AGRONOMIC FEATURES

Yield Cuts	6+
Fall Growth	NA
Stand Persistence	Excellent
Early Seedling Growth	Excellent
Drought Stress	Very Good
Recovery After Cutting	Very Fast
Forage Quality	Excellent

## DISEASE TOLERANCE

Bacterial Wilt	High Resistance
Verticillium Wilt	Resistance
Fusarium Wilt	High Resistance
Anthracnose	High Resistance
Phytophthora Root Rot	High Resistance
Aphanomyces Root Rot	Moderate Resistance
Disease Rating Index	NA
